

Start Making Money Today!

By: Shahnee Zaver

HAVE AN OPEN MIND AND THE MONEY WILL FLOW

You turn on the news and the perils of the country's financial crisis continue. You open up the paper and look for signs of life in the economy but there is scant evidence that things are looking up.

So how does one stay optimistic and even find financial prosperity in such a seemingly unstable time?

Don't Believe the Hype

Start with making the decision to not buy into what the media tells you. Often this causes people to

respond reactively and defensively. Instead shift your consciousness. Focus your thoughts on staying positive and upbeat and start taking action. The first step to creating more money, whether it be to supplement your income, pay off some bills or take a much deserved vacation, whatever the reason may be, it all starts with your mindset.

Gain Clarity

First get a clear idea about what you don't want. By doing this you are naming what is no longer acceptable in your life. For example you may no longer want any debt in your life. Or you may not want to have to field calls from creditors. Whatever it is, name what it is you don't want.

Secondly, name what you do want. Your intention. This needs to be detailed and very specific. Name the amount of money you would like to make, and write it down on a piece of paper, such as "I would like to make an extra \$1,000 per month." Or in the next 60 days I would like to attract \$25,000. How much would you need to bring in in one day to reach your end goal? Create a revenue model and adjust as needed. Stay flexible. Do you want more abundance in the form of a new car? What kind of car do you want? What is the make, model and color? If it's a new house, where is the house and what does it look like? You get the idea. Cut out a picture, put it on your fridge, or in your wallet and carry it around with you. Or download a photo of whatever it is on-line and use it as your screen saver. Be specific. The more detailed you are the more real it becomes for you and the closer you get to attracting it.

Thirdly, align yourself with whatever it is you want. Visualize and see yourself as someone who is

wealthy and prosperous. Choose to see the opportunities that are right in front of you. The trick is to see yourself already in possession of what you want. This is why being clear about exactly what you want is key to you attracting it. Again, the more detailed and specific you are, the better.

Fourthly, action. Taking action and having an unwavering belief in yourself will surely help you attract what it is you want, but you must take action. Decisive, clear action will start the flow of increased wealth into your life and straight into your bank account.

Think like an Entrepreneur

Identify the skills you already have. Are you good with children? Could you start a daycare in your home on a part-time basis or become a part-time nanny or babysitter? Are you a teacher? Could you start a tutoring company or tutor virtually? What about becoming a digital assistant if you have an administrative background? On-line virtual jobs are becoming increasingly popular and a viable way for many people to find work and make money. Again the key is to start generating money from what you already know. Do you cook, clean, sew, design, paint? Look at all the ways in which you can add value to your talents and skills and start monetizing them.

Have a Strategy

Get specific and put together a strategy for making money. This includes learning to market yourself, learning to sell, understanding some level of finance and putting a core team of people together if need be. Reach out to your community and the people you know for help. Model yourself after those that are doing what you want to do and partner up with them wherever possible. Learn to be an entrepreneur. Valuing yourself means others will too.

Change your mindset and it will change your life. Get on the service side and start making money today.
